| 15    | 30     | 12   | 00       |

The vse of this Table.

Adding the houres adioyning to the Portes in this  
Table contained, vnto the Moones comming to the  
South, produceth the time of the tide in that Port.  
Example, the Moone is 9 daies old, now in this Table  
vnder the age of the Moone, I finde 9 in the first space,  
In 2 there I find her coming to the South, at 7 and  
12 min. Now for London, I finde it in the last space 3  
houres, which added to 7 houres 12 min: maketh 10  
houres, 12 min: the water at Lond. the same 9. day.

A memoriall of the time thence some great Accidents  
vntill this present ycere, 1627.

|                                                                                                                   |      |
|-------------------------------------------------------------------------------------------------------------------|------|
| Since the Creation of the world                                                                                   | 5589 |
| Since the vniuersall Deluge, or Noahs flood                                                                       | 3933 |
| Since the destruction of Sodom                                                                                    | 3542 |
| Since the Sunne stood still in Ioshua's time                                                                      | 3031 |
| Since the destruction of Troy                                                                                     | 2810 |
| Since Brute entred this Island                                                                                    | 2714 |
| Since the building of London                                                                                      | 2734 |
| Since the Sunne returned ten Degrees backe                                                                        | 2315 |
| Since the last destruction of Ierusalem                                                                           | 1544 |

January hath xxxi. dayes.

Now warme meates, warme cloathes with warme exercise embrace: Drowlesse and Venery, Bathes, and Phlebotomy abandon, yet may ye sleepe longer then when the dayes be the longest. All hath a time and place, and nothing seasonable alwayes.

February hath xxviii. dayes.

Thinke not on opening Meine, vse warme Bathes  
daintely: white meats and foggy fen: fowles, with foode  
of phlegmaticke humors which worke raw crudities. are  
now to be cheefly refused: fire purgeth grosse ayre, moderat  
laboure easeth a body.

March hath xxxi. dayes.

When Sol exalted surmounts the Ram with his hotte  
rayes: Mars if made bregeth, esteemes Phlebotomie as  
wholesome, and are medicines if they be skillfully applyed,  
dangerous as they proue, when they be skillfully taken.

# May hath xxxi. dayes.

Thrice welcome merry May, the sweetest month to thy  
 spirits, with fresh notes, merry peales, and all sweetness  
 bravely triumphant. Let blood, purge and bath, one cor-  
 diall Antidote best thou, quicken earely rising, to bodie and  
 minde very ioyous.

June hath xxx. dayes.

Cooler herbes not hurtfull if they be wisely chosen. New sweetish thicke drinks, with such leane. Bid Medicines farewell for a time, live topfully as heart may, when Sol signed in his Auz. with Solstice Aestiuall heateth.

July hath xxxij. dayes.

Goodnight blood-letting, that many phantasies & griefes cures: in lieu of medicines let cooling victuals and bathes blood with discretion suffice: play and sleepe moderately. Dogge and Lyon reigne like Vulcan hot as a furnace.

# August hath xxxj. dayes.

Physicke adlew, whilst scorching Syrius bittereth his  
out-rage: from trauailing refraine: small eating brings  
very great ease: sleepe but a little, lize very well, but lust  
very little. Dog hath a day, and a weeke, and a moneth,  
and dead is the mad Dogge.

November hath xxx. dayes.

Old sweet wines cherish weary limbes, which pleasure abatech: no time for bathings, warme kitchen Physicke enableth good blood, good spirits, good health: syle wantonnesse and sloth. two capitall enemies, to bodie and soule very payous.

December hath xxxj. dayes.

Glue me hot meates and drinckes, quoth cold and durt?  
December: for milke and white meates I resemble Ianu in  
all points. Exercise and Spices do well by phlegmaticke  
Hog head: all hath a time and place, and nothing seasona-  
ble alwayes.

Browne. 1627.

A PROGNOSTICATION  
on for this present yeare  
*of our Redemption. 1627.*

Amplified with new additions  
very commodious and profitable:  
with new Tables and Rules thereto annex-  
ed, for all those that vse Purchasing or  
buying of Annueties, or borrowing;  
*fit for sundry occasions, which the  
Ingenious may use to their  
pleasure and profit.*

By DANIEL BROVNE Well-Willer  
to the Mathematicks, and Teacher  
of *Arithmeticke, and Geometry;*  
Dyalling and Surveying. Some-  
time a Scholler of Christ Church.

*When I behold the Heauens, euen the Workes of  
thy fingers, the Sunne, Moone, and Starres  
which thou hast ordayned for signes, seasons  
and for dayes and yeares.*

---

LONDON,  
Printed for the Company of Stationers.  
1627.

*Cum Priuilegio.*

These Artes are taught by the  
Author. *viz.*

*Arithmeticke* { The keeping of a Merchants Booke, by  
Debitor and Creditor.  
VVhole numbers and fractions.  
Extraction of rootes.

*Geometry* { Principles thereof with practise, and  
Demonstration.  
Surveying of lands, with many vsuall  
Instruments.  
Reducing of maps.  
Dialling.  
The vse of both the Globes.

Note Instruments in brasfe fitting the Mathematicks,  
are made by Mr. *Elias Allen* ouer against St. Clements  
Church. And in wood by Mr. *Iohn Thomson*, and *Nathaniel  
Noble*, aboute St. Clements Church, toward the May-  
Pole.

To

TO THE RIGHT  
HONORABLE, MY VERY  
Good Lord, HENRY Lord LEY  
Barron of LEY : All Ho-  
nour, Health, and Happy-  
nesse.

*Right Honourable :*

**V**ouchsafe to receiue this little  
Pamphlet, being my next  
yeares annuall exercise, where  
in these twelue or thirteene  
yeares, as in a course of study,  
amongst the rest of the Mathemat. I  
haue other whiles vpon occasion, and to  
some reasonable purpose beene exercised,  
neverthelesse, considering I haue not as  
yet any other determinat matter or object,  
wherein I may so conveniently eyther enure  
my Pen, or declare my dutifull affection to-

*The Epistle Dedicatory.*

ward your good Lordship, unto whom I  
remain bounden: for this only reason I am  
content, rather of generall necessity,  
then of any speciall choyce, rather  
this way then no way, to practise my  
stile, and as I may to continue your Lord-  
ships Honourable good opinion. I was  
lately resolved to haue undertaken an ar-  
gument of an other qualitie, but conueni-  
ent leasure would not suffice, for the per-  
formance thereof. And thus I end, leauing  
your Lordship to thinke of it. I turne my  
Writing to praying, for the long life of  
your Honour in the highest felicity. Here  
at *Cricklad* this 27. of *March*. 1627.

*Your Honours in all humble*

*Serviceablenesse.*

**Daniel Browne.**

## A brieft Declaration of the fourc Quarters of this Yeare. 1627.

Sol in ♊, ♋, and ♌.

*Hereafter the Winter, the Spring, the Summer  
and Haruest, shall not cease so long as the earth  
remaineth.*

**W**inter according to our English account began the  
last yeere 1626. at the time of the Sunnes ingre-  
dience into that cold & dry signe Capricorne, viz. the  
11. day, the 18. houre of December. at which time was  
the Brumall Solstice or shortest day in the yeere, by reason of the  
Sunnes greatest South declination from the Equinoctiall, &c.  
and continueth in this yeere 1627. vntill the 12. day of March.  
The Winter season is cold and moyst, and therefore increa-  
seth fleame, which is like in complexion vnto it. The Di-  
seases incident to this Winter quarter, is griefes in the  
sides, Rhume, Coughs, Joynt-ache, and Head-ache, and  
the Stone.

A cold Winter and moyst is profitable, yet too much  
moystnesse destroyes the Winter Copie. a warme and moyst  
Winter is vntwholsome.

## A Prognostication.

Sol in  $\Upsilon$ ,  $\delta$ , and  $\Pi$ .

The Lord God causeth grasse to grow for the cattell, and hearbs for the vse of man, that hee may bring forth bread out of the earth.

**T**he Sunne hauing finished the Winter, with the last part of Pisces, at his entrance into the first minute of Aries, making the artificiall day equall with the night. Sol rebinieth the most delectable annuall revolution called the Spring, which will be this yeare, the 12. of March. The Sunne, Plato affirmeth to be the soule of the World, and all liuing things to receiue life from him: for all augmentations, increasements, and ripenesse of fruits, beastes, and other things vpon the earth, is of Sol, hee is also the gluer of times; and therefore at this time hee reuiuet, the most temperate time the Spring. this time encreaseth blood, and bringeth all the parts of the body to a temperance as high as it can. for it of all other times is the most temperate, neither excessively hot nor cold, neyther moyst nor dry. And Galen doth much blame them that name it to be hot and moyst, which (he sayth) is of all other the most pestilent state of ayre. The diseases of the Spring, is falling sicknesse, Squinances, Coughes, Ache in the necke, belly, legs and feete.

A warme and moyst Spring is commendable. If the Spring be dry and something warme, there shall be but little fruite yet very good; if cold, the fruits will be rotten and neuer come to be ripe.

Sol in  $\zeta$ ,  $\eta$ , and  $\theta$ .

Go to the Pismire, O sluggard, behold her wayes, and be wise for she prepareth her meate in the Summer.

**S**ummer beginneth, at the Sunnes ingresse into the beginning of Cancer: at which time hee is in his nearest to our Verticall poynt, making his greatest Declination towards the North from the Aequinodiali, and causing the Actiuall or Summer Solstice. and per consequens, the longest day, and shortest night in the yeare. which will be this yeare the 12. day of June, at 10. in the morning. The Summer is in completion

## Browne. 1627.

Mercur hot and dry, and therefore meete to encrease choller, which at that time doth abound.

The diseases of the Summer, are continuall fevers, burning Feavers, paines in the head and belly, Vomits, burning in the heart and breast, with immoderate sweating.

Much rayne in Summer putrifies the fruites, and there shall be no great store of graine: many diseases will follow, if it be over dry, it argueth scarcity in all manner of graine, the Summer fruites will be whollome: fishes shall die, if over hot there will be many sicknesses, and store of fruites that Summer, If (to conclude) it be cold, the yeere will be whollome, but the fruites will be late: so the Elements must be well tempered, else the earth cannot be fruitfull.

Sol in ♌, ♍, and ♎.

Let vs now feare the Lord our God, that giueth raine both early and late in due season: he reserueth vnto vs the appointed weekes of the Haruest.

**T**he Haruest Quarter, or fall of the lease, beginneth at the time of the Sun entring into the first minute of the second Aequinoctiall Signe Libra, taking place this yeere the xiii. day of September, at 9. and 10. minutes at night. When the Day and Night accord secondly in equall length. The Haruest, is dry of complexion, and neither onely hot nor onely cold, but is distemperate in heate and cold, so may it not be called iustly (as most men doe name it) cold and dry. In this time doth melancholy encrease.

The diseases which commonly doe happen at this time, are oppilations of the Spleene, Dropfies, Consumptions, Ache in the Ruckle-bone, fretting of the bowels, paine in the knees and thighs.

A cold and dry Autume is laudable: much moysture doth putrifie the Ceres, the beginning very dry, the last part moyst, shewes penury of fruites the ensuing yeare, if the first part be hot it will be full of sicknesses, if too cold it is hurt to fruites vngathered.

## A Prognostication.

### A definition of Astronomy.

**A**stronomy is the perfect knowledge of the miraculous workings of the Planets, and Heavens, (and especially of the Sunne and Moone) whereby is caused the variety of times, dayes, yeares, and ages; and the diuersity of all natural things, as hot, cold, moist, and dry, which are augmented or diminished by the more or lesse influence of these two Luminaries, as they come neerer vnto vs at sometimes, or depart further from vs, at other times, with diuers motions in diuers climates; which causeth not onely variety of times in sundry climates; but also the variety of diuers complexions, formes, and dispositions of all Creatures vnder the face of Heauen, none other accidentall conteng, voluntary or violent cause, to the contrary notwithstanding. And this is that Plato meaneth by these words, *Vt tempus cognosceremus ac vniuersæ naturæ ordinem, &c.* That is, to know the times and vniuersall order of nature: And doubtlesse, who so well considereth the innumerable effects that are caused, especially by the variable moouing of the Sunne in the Zodiacke, must needs acknowledge it to be the chiefe instrument and meane that God useth in the generation, preservation, and alteration of all Creatures that are containd in the world, of generation and corruption. And for this consideration, certaine of the ancient Philosophers, called the Sunne, the soule of the world: other, the eye; and other also, the heart of the world. Plato also affirmeth, that the Sunne is the soule of the world, and that all other liuing things receiue life from thence; and hereof commeth the saying of the Philosophers, *Sol & homo, generant hominem*, That is, The Sunne and man, beget man, &c.

And also, by the motions of the Heavens wee haue the distinct course of Times, Dayes, yeares, and ages, aswell for the consideration of sacred Prophecies, accomplished in due time foretold, as for high mysticall Solemnities holding, and for all other humane affaires, conditions, and covenants bypon certaine time betweene man and man, with many other great vices, &c.

Iudiciall

## Iudiciall Astronomy.

It hath beene an order and a custome (amongst the most excellentest and wisest Physicians, to choose the Moone for the principall Significatrix of the sicke Person, and according vnto her motion, situation, and configuration (with other Planets) haue giuen iudgement on the increasing, mitigation and alteration of the disease; which of the Physician is called Crisis, that is a swift and vehement motion of a disease, eyther to life or death, and it hapneth about the supreme intention of a disease. Also Galen (in commento de diebus Criticis) sayth. A Physician must take heed and aduise himselfe of a certaine thing that faileth not neither deceiveth, which the Astronomers of Egypt taught) that is to say when the body of the Moone is joynd with fortunate Planets and Starres, dreadfull and fearefull sicknesse cometh to good end. And therefore the expert in that excellent science of Physicke, doth obserue and marke how the Moone passeth through the Zodiacke; and with what Planets she is ioyned; whereof they do vnderstand much of the alteration of the sicknesses, for the Moone with the good Planets, as Iupiter and Venus, or aspected well of them tendeth to good. Contrarywise with the euill Planets as Saturne and Mars, or euill aspected of them, doth pronounce and cause euill essence of the sickness, in so much that such dayes in euery moneth is to be accounted more dangerous then the rest to fall sick in. Which dayes I haue noted in my Almanacke, with their Characters, vnder the Aspects of Luna to Saturne and Mars. Thus a ☿ Coniunction, this a ☐ Quartile, this a ☿ Opposition: For example, The 7. day of March, the ☿ of Saturne and the Moone, the D being in X of H afflicted, the griefe shall happen of fleame congealed by melancholly. Also the 16. of March the ☿ of Mars and the Moone, the D being in N. of J. afflicted, the disease shall come of blood aduile. For Astrologers say, that among all the other Planets the Moone (in ruling) hath most power and mastery of mens bodies. Ptolemy sayth. vnder the moone is contained sickness, therefore about the alteration of mans body, the Moone worketh principally; and because her orbe is nearest to the earth, sendeth vs the vertue and impression of the other Planets; and causeth

## A Prognostication.

causeth the mutabilitie and alteration of mens bodies, to bee good or evil, according to the nature of that Planet with whom he is adioyned, which agreeth to the saying of Prolomeus in the 16. Aphorisme of his Centiloquio. Behold the motion of the Moone as she passeth through the Criticall, Iudiciall and mortall dayes, for if she be in them fortunate, it will fall out well: if Unfortunate, the contrary, if any object, that this was the opinion of an heathen, Mr Iohn Calvin a great divine, granteth this also, that melancholy, choler, and other humours, are mooved and wrought by the Planets. And by the censure of the great. Astrologicall and Theologicall Doctor Frauncis Iunckinus, that by the motion of the Moone and Planets are knowne the Criticall and dangerous dayes, when the sicknesse will bee more remitte and placable. And when it is convenient to vse outward, or inward medicines.

Concerning cautions in ministracion in Physicke, as purgations, laxative, or phlebotomie, seeing the fore sight, and prevention of such especially appertaineth to the learned in Physicke, wherein they can helpe themselves, and others. God giving a blessing to their practise, for of the most high commeth healing. I commit them to the consideration of the learned, in that excellent Science of Physicke and Chyrurgery.

---

### Husbandicall Elections in planting, grafting, and sowing.

To all things there is an appointed time, and a time to euery purpose vnder the Sunne. A time to plant, and a time to plucke vp.

**B**Efore you plant or grafft, consider the winde, for if it be in the North, or Northeast, & by north cease thy labour, because the North wind, causeth dry colds, and hurteth the fruites and flowers of the earth.

Generally plant or grafft in the ending of Autumne, or beginning

## Browne. 1627.

ming of Spring: especially the moone increasing in Taurus, Virgo, Capricorne, & Pisces.

Fell timber from Midsummer to Christmas, especially from the change to the full, in dry dayes and not in wet and windy, leauing such as be winde fallen, as well for that the timber is not permanent, as also that Astrologers say, the houses buile therewith, are subject to danger in time of tempests: you are best before the retiring of the sap to cut the timber tree round about, vntill you come neere vnto the end of the sappe, and so leaue the tree growing vntill you see that the sap hath all runne downe, and ceased dropping; whereby you haue purified the tree.

For coppies in the first quarter, the moone in  $V, \text{♌}, \text{or } I$ .

Sheare sheepe in the increase.

Seld all the increase, the moone in  $V, \text{♌}, I$ .

Cut vines, in February, & September, the  $D$  in  $V, \text{♌}, \text{or } II$ .

Remoue trees the last Quarter, in November, & February, the  $D$  in  $V, \text{♌}, II$ .

Sow seedes, whose fruite will be round, three, & four dayes before the full.

But to sow for store, take the increase from February, to Iune.

The moone in  $S, S, M, \text{or } W$ , in  $\Delta$ , &  $*$ , with  $H$ , is a fit time to plant, graft, & to do any kind of Husbandry, the like is the moone in  $\text{♍}$ , in  $*$ , &  $\Delta$ , with  $U$ , &  $Q$ .

Note also that it is best time to Plant in the second quarter of the Moone, so the  $D$  be not aspected by  $S$ , &  $S$ , of  $H$ , &  $S$ .

Sow Corn the Moone in  $S$ .

## Of the Eclipses this Yeare.

1627.

**A**n Eclipse of the Moone will happen the 18. day of Iuly, the 8. houre, and 3. min. according to our English account; but according to the Roman account the 28. day of Iuly, 7 houre, 6. minutes before noone, when the Moone passing by the Tayle of the Dragon, shall be found opposite to the Sun, the

## A Prognostication.

the digits Eclipsed are 15 degrees, 27. minutes, the whole  
durance 1. houre, 49. minutes. The cause of the Moone  
Eclipsed is, the Sunne being in the contrary point to the full  
moone, enforceth the shadow of the earth, then directiv put  
betweene the Sunne and Moone, towards the Moone, bl-  
ding more or lesse of the Moone, as they differeth from the  
Eclipticall.

---

**A L S O** nothing else is the Eclipse of the Sunne, but  
the direct putting the body of the Moone betweene the Sun  
and the earth, or betweene our sight, and the Sunne, which  
chanceth onely at the change. By this you may gather that  
the darknesse at the death of Christ. That St. Luke sayth,  
was about the 6. houre, and continued unto the 3. houre,  
which according to our account, is from 12. a clocke to 3.  
Not to stand by naturall eclipticall cause; but by supernaturall  
or miracle: For it was at the full Moone, for St. Augustine  
sayth, that the Jewes did keepe their feast of Pascheover,  
alway at the full Moones, and at that time Christ suffe-  
red. Which enforced Dionysius a Senator of Athens, behold-  
ing that Supernaturall Eclipse, cryed out saying: Aut Deus  
naturæ patitur, aut mundi machina dissolvitur: The God of  
nature this day suffereth, or else the world must needes  
perish for ever.

Athens is from Hierusalem 780. miles north-west, and by  
west, so farre was Dionysius from Ierusalem, when he did be-  
hold that Eclipse.

An easie Table, for all those that vse Trading, Buying of Annueties, Purchasing or borrowing, after eight in the Hundred, at Compound interest.

What a 100 pound forborne, for any time vnder 21 yeares commeth vnto, according to the rate of 8 pound in the hundred, at compound interest.

|    | £.  | §. | ð. |
|----|-----|----|----|
| 1  | 108 | 0  | 0  |
| 2  | 116 | 12 | 9  |
| 3  | 125 | 19 | 5  |
| 4  | 136 | 0  | 10 |

| 20 | 196 | 7  | 3  |
| 21 | 200 | 6  | 8  |

## A Prognostication.

### The Vse of these Tables.

**A** Man dyed, who gave by will to a Child 100. £ then borne, his executors agreeeth to let out the 100. £ to occupy till the Child come to the age of 21. yeares, Covenanting with the party to pay the interest, and the interest upon interest, as it groweth due after the rate of 8. pounds per Annum. What will it be at the end of 21. yeares, I looke in the Table over against 21. yeares. and there I finde it is 503. pounds, 7. shillings, and 8. pence, so much it amounteth unto in 21. yeares.

### The Vse of the second Table.

**I** Buy a Lease worth 20. pound over the rent per Annum, this lease is to endure 12. yeares. What shall I give for this 20. pound per annum for the 12. yeares, reckoning my money after compound interest, I looke in the Table for 12. yeares, and over against. it I finde 151. pounds, 13. shilling, and 6. pence.

### An Abstract

An Abstract of a Direction  
Concerning reall Contracts.

**W**Hosocuer shall desire to Purchase or put to Sale, to take in Lease, or let to Farme, to Grant, Assigne, Set ouer, exchange or otherwise to contract or deale with or for any Lands, Leases, Manton Houses, Rents, Reversions, Annuities, &c. Or to redeeme any such from danger of Forfeiture: may haue ready meanes for the accomplishment of what shall be desired, on the one part or on the other, in any the cases aforesayd, or the like.

At the Portcht-House right  
against the end of Shooe-  
lane in Holborne. *London.*

*God saue the King.*
